

A DIVISION OF FONON TECHNOLOGY INTERNATIONAL

# Medical Device Marking

Using our Fiber Laser marking, cutting and engraving technologies, Laser Photonics exceeds the high quality and performance expectations of the medical industry. Laser Photonics provides a wide variety of systems and solutions designed to meet all of the application requirements demanded by the medical industry.

Our Fiber Laser marking, cutting and engraving systems are used in many different ways for UID (Unique Identification), UII (Unique Item Identification) and for DPM (Direct Parts Marking) of logos, serial and part numbers, lot and date codes, schematic graphics and many more!
